## ■ ONLINE – CONFERENCE | WEB – CONFERENCE

This is a popular solution for organising meetings with a small number of people. Often programs like Zoom, GoTo Meeting or Microsoft Teams are already established in companies. PSAV supports you with the handling and provides access to the desired platform on request. The conference can be held without technical support. Functions include:

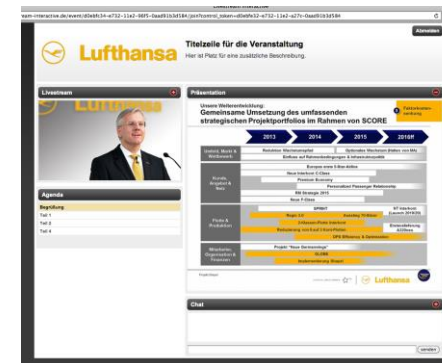

- Video Conference
- Share desktop
- Scribble function
- Chat
- File Sharing

# ■ STREAMING | BROADCAST

Broadcast solutions integrate different sources, such as professional HD studio and camera technology. A stable Internet line with dedicated bandwidth, as well as camera-compatible lighting and professional sound system with audio recording ensure the high quality of the broadcast. The event to be broadcast can take place anywhere. Use the fully equipped studio of PSAV. We recommend the use of an EventApp to increase interaction. Features of the broadcast format include:

- Professional TV Quality
- Questions via Chat
- Broadcast of any content
- Embedding on company website or social media channel
- Incorporate EventApp for heightened engagement
- Recording and OnDemand viewing
- Attendee Management
